-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CLAIMS 1-7 ARE PENDING

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Hanson et al (Hanson), US 6,697,835, 24 February 2004.

Hanson is directed to parallel accessing of data stored at a number of remote heterogeneous sites [COL 1 lines 14-18]. A local user site agent interprets a data request in the form of a script containing a data source object name and a user-defined program to be executed on the data [ABSTRACT].

As to claim 1, Hanson provides for the agent at local user site [FIG 1 19] to itself be remote [COL 4 lines 38-39]. In this context, a first request source in Hanson corresponds to a source accessing the local site from a network, and a second source corresponds to the user site of the agent.

The agents residing at each site correspond to first and second search engines, respectively. There are two sites in Hansen that act as a source detector, the user site agent [COL 4 lines 8-13] and a second agent interpreter [COL 4 lines 13-14] at a remote data site such as ORACLE, FIG 1]. The attribute of the source that is detected and which determines the data set to be returned is the user-defined script, determined at the source of the request.

As to claims 2-6, Hanson is explicit about the use of the Internet [COL 7 lines 6-9 and Web pages in particular [COL 34 lines 23-38], and the use of a DBMS such as ORACLE [FIG 1]. As noted above, the agents involved are source detectors.

The elements of claim 7 are rejected in the analysis above and this claim is rejected on that basis.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Amsbury whose telephone number is 571-272-4015. The examiner can normally be reached on M-F 6-18:30 FIRST WEEK.
